Sealmatic Bags Order From Rumaila Project (Iraq) To Supply 38 Critical Mechanical Seals & Seal Supply Systems As Per API 682

MUMBAI, November 01, 2023: Sealmatic India Ltd, listed on the Bombay Stock Exchange (BSE: BOM: 543782) reported that it has bagged one of the most prestigious order to supply 38 API mechanical seals along with API Plans for the **Rumaila Project (Iraq)**.

Rumaila is one of the world's super-giant oilfields – those that contain over a billion barrels of recoverable oil. It is estimated that some 17 billion barrels of recoverable oil are still contained within Rumaila's reservoirs.

Rumaila is managed by the Rumaila Operating Organization (ROO) – a joint venture between BOC, Basra Energy Company Limited (BECL) and Oil Marketing Company (SOMO) which was established to transform the field into a world-class operation to serve Iraq and its people.

Rumaila is overwhelmingly an Iraqi operation, with around 6,800 Iraqis working as ROO staff. A further estimated 22,000 Iraqis are employed via contractors who support Rumaila's activities through a large supply chain. International staff from around the world make up around 5% of the workforce and ensure Rumaila benefits from expertise gained at other oilfields.

Mr Umar AK Balwa Managing Director, said: “We are extremely pleased to inform that under stiff competition from international giants and stringent technical specifications, Sealmatic has successfully won the prestigious order to supply high critical mechanical seals for demanding applications for the Rumaila Fields in Iraq. Sealmatic has designed tailor made solutions to meet demanding operating conditions, thus bringing areas of design, operation and maintenance with a view to achieve the highest safety standards in a cost-effective manner. This installation will create recurring high profitable spare parts business for the company through the life time of the equipment.

Sealmatic offers the widest portfolio of seals and seal supply systems in accordance with API 682 4th edition. Sealmatic's API-compliant mechanical seals offer technically competent, practical solutions that provide significantly greater safety and process reliability in refining technology, petrochemical, oil & gas and chemical industries”.

The processing of crude oil in refineries is a complex and multi-stage process in which crude oil is transformed into refined, high-quality end products or feed materials for petrochemical industry. Sealing technology for such diverse applications must meet challenges in various respects; risk of insufficient lubrication and dry running, media with a diversity of physical properties, high and low temperature ranges and the handling of hazardous substances and all other conditions which need to be controlled with absolute reliability. With a comprehensive range of API-compliant quality seals and supply systems Sealmatic is playing a key role towards ensuring the reliability and safety of refinery processes.
