

Sealmatic – Corporate Social Responsibility 2026

At Sealmatic, Corporate Social Responsibility (CSR) is not viewed as a statutory requirement alone, but as an integral part of the company's purpose and identity. Guided by the belief that businesses grow meaningfully only when the communities around them progress, Sealmatic continues to invest time, resources and commitment in initiatives that create long-term social value and inclusive development. Sealmatic CSR framework is carefully designed to address some of the most critical social needs of our communities, with focused efforts in education, skill development, healthcare, food support and environmental sustainability.

At Sealmatic, the spirit of social responsibility is inspired by a simple yet powerful belief in the value of compassion and sharing. As **Buddha** beautifully expressed, **“If you knew what I know about the power of giving, you would not let a single meal pass without sharing it in some way.”** This thought strongly reflects Sealmatic approach to community engagement, where every contribution, be it big or small, it is made with sincerity and the intention to uplift lives. In the same spirit, the words of **Winston Churchill** resonate deeply with the philosophy: **“We make a living by what we get, but we make a life by what we give.”** Together, these timeless reflections capture the essence of Sealmatic CSR journey, where business success is meaningfully aligned with service to society and long-term social impact.

At Sealmatic the CSR framework continues to focus on education and skill development, healthcare and community well-being, food support and environmental sustainability. In the area of education and skill development, Sealmatic remains committed to enabling access to knowledge and employable skills for underprivileged youth. In addition, Sealmatic has extended its support to the MK Education Society by facilitating IT education for underprivileged students across Mumbai's suburban regions, helping them acquire essential digital and technical skills that significantly enhance their employability and future prospects.

Healthcare and social well-being continue to be an important pillar of Sealmatic CSR activities. The company sustained its support for the Blind Organisation of India, Mumbai, assisting visually impaired individuals through medical aid and the distribution of food grains on multiple occasions. In addition, Sealmatic also extended assistance towards cataract operations and broader medical support initiatives, helping patients and their families with treatment costs, medicines and essential medical investigations. These efforts aim to reduce the burden faced by families during critical health challenges and ensure timely access to care.

In line with its growing commitment to environmental responsibility and sustainable development, Sealmatic partnered this year with the Green Helping Foundation Trust. The foundation works actively towards environmental protection, green initiatives and community awareness programmes focused on sustainability and responsible living . Through this association, Sealmatic extended its support to the foundation's ongoing initiatives aimed at strengthening environmental awareness and encouraging community participation in sustainability driven activities. The involvement of Sealmatic in this initiative reflected its belief that industrial growth must be complemented by conscious efforts to protect natural resources and promote greener practices within society.

Sealmatic CSR initiatives reflect a deep commitment to community upliftment and social resilience. The company strives to address immediate needs while also building a foundation of dignity and care within vulnerable sections of society. By continuously focusing on education, healthcare, community welfare and environmental sustainability, Sealmatic demonstrates its unwavering commitment to empowering individuals, enabling opportunities and nurturing long-term social progress.
