# Sealmatic Opens New Service Centre In Oman With Edgo Group

Oman is a strategic partner of India in the Gulf and an important interlocutor at the Gulf Cooperation Council (AGCC). The two countries across the Arabian Sea are linked by geography, history and culture and enjoy warm and cordial relations, which are attributed to historical maritime trade linkages, intimacy of the royal family with India, coupled with a large Indian diaspora working in Oman.

Edgo/Sealmatic has opened a repair, refurbishment services and engineering applications support centre for mechanical seals in Oman to service customers in the oil and gas, petrochemical, power, water, desalination, chemical and other industries.

Sealmatic has expanded its products offering in Oman with the opening of its new service centre in the heart of its industrial activity. Building on the Edgo partnership and its existing local pump servicing capabilities, this specialist facility will provide maintenance and repair services for all types of mechanical seals. This latest investment will help customers in the region to optimize the performance and reliability of their rotary equipments.

Sealmatic has witnessed success in supplying high performance mechanical seals to the oil and gas, power generation and water sectors. Following this achievement, Edgo/Sealmatic has invested in a purpose-built service centre to support customers with after-market services including reverse engineering, spare parts management and maintenance contracts. In addition to the benefits available in the workshop, Edgo/Sealmatic will also provide field services of experienced personnel to deliver on-site installation, fault finding and maintenance. The service centre is equipped with state of the art machinery, including lathes, milling machines, lapping machines, testing units etc.

The Engineering and Development Group (Edgo) is an international company focused on the energy services sector. Since its inception in 1956, Edgo has grown into a diverse and successful multidisciplinary business, providing oilfield services and support operations to the oil and gas industry in the Middle East and Africa.
