Sealmatic Complies With: Workplace Assessment For Safety And Hygiene (WASH)

Sealmatic has recognized the post-virus issues which include a larger focus on health, safety and hygiene conditions of employees, customers and public at large. India's decision to start opening up the economy in a staggered manner, while laudable, requires a plan to make sure that exceptions are minimized and recurrences of spread are strategically isolated. The positives of the lockdown cannot be afforded to be negated and therefore, there is a need to bring specific standards/protocols for the business organizations, institutions etc. to ensure that they are able to operate safely with little or no instances of recurrence.

Sealmatic has ensured a few imperative priorities for the organization as mentioned below:

- Ensuring safe operations and workplace for safeguarding health and safety of employees, customers and public.
- Complying with all new COVID-19 related requirements from regulatory/health authorities and/or other Government bodies.
- Ensuring business continuity in operations to serve customers and protect businesses.

The assessment has been done on-site and ensures with an objective of the safety and hygiene measures undertaken by Sealmatic to mitigate the risk of COVID-19 infection.
